- Registered student can give test for a particular subject
- Marks and Passing status is displayed on screen on successful completion
- Exam of particular subject should be submitted within a stipulated time
- Admin able to view student details based on city,state etc.
- Student can update profile and view all his reports(backend only)

# Agile Methodology

- Agile scrum methodology is a project management system that relies on incremental development
- Modern way of technology to accomplish software development projects
- In contrast to earlier SDLC methodologies, Agile focuses on flexibility, adaptability, creativity, innovation, quality improvement
- In particular, scrum is a collection of meetings, roles and tools that work together to help teams to better structure and manage their workload.
